## Extract

9 years in experience as a Linux/UNIX Sysadmin, working in high availability and high performance environments, building both physical and virtual infrastructures to satisfy the daily market standards. Great problem solving skills and love for what I do.

## Professional Experience

- |                    |  |
|--------------------|--|
| 06/2018<br>today   | <b>DevOps Engineer at Elementum SCM</b><br>I'm working as a Senior Devops Engineer for the TechOps team, building and improving the infrastructure who holds the Elementum's Supply Chain Management system.   |
| 02/2017<br>06/2018 | <b>DevOps Engineer at Infor.com</b><br>As a DevOps Engineer I am committed to write, improve and maintain the cloud automation stack over AWS for next generation e-commerce and retail systems.   |
| 04/2014<br>02/2017 | <b>Systems Administrator Lead at Navent</b><br>As a Sysadmin Lead my work points to organize the area's tasks to achieve the best performance for our infrastructure using high performance software and hardware. Over the last months I was focused on the automation implementation over Openstack using Terraform and Ansible. |

|                    |   |
|--------------------|---|
| 04/2013<br>04/2014 | <b>SSr. Systems Administrator at Bumeran.com</b><br><br>As a Sysadmin, my work is focused to build, tune and improve the performance of our servers. Now I'm working with Apache Lucene/Solr, Memcached, Resin, Nginx and high availability services using HAproxy and Heartbeat. Currently our infrastructure has over 200 servers located at Verizon Terremark in Miami, Florida. |
| 12/2012<br>04/2013 | <b>Infrastructure Administrator at Nightlify</b><br><br>I am responsible for the development and layout of the website. I'm working with Twitter bootstrap and Foundation framework using Sass extension. Also I'm responsible for the network and server infrastructure based on EC2 instances using Memcached, Nginx and MongoDB.   |
| 12/2012<br>12/2013 | <b>Network Administrator at Hipernetworks</b><br><br>I am responsible for installation and tuning of networking systems and the development of websites and web applications. I have used technologies as Ubiquiti and Mikrotik.  |
| 07/2010<br>04/2013 | <b>Sysadmin at Equipos Creativos</b><br><br>I am responsible for installation and tuning of our server infrastructure mounted in Argentina. I have worked with several technologies like Apache, Nginx, Cherokee, Lighttpd, MySQL and Postgres.   |
